

SGRISER

STRONG WAX REMOVER FOR STONE MATERIALS

User guide

DESCRIPTION:

Alkaline-solvent solution based on water, inorganic bases, glycols, surfactants, emulsifiers, sequestrants.

FIELDS OF APPLICATION:

For the strong degreasing de-waxing washing on all stone materials (cotto, stone, klinker, gres, cements, grits, etc.).

CHARACTERISTICS:

SGRISER is an alkaline detergent/solvent for strong degreasing dewaxing washing on all stone materials: cotto, stone, klinker, marble, concrete, grit, etc.

SGRISER:

- removes old oil and/or wax impregnation treatments and consistent greasy deposits from stone materials, even delicate ones (eg polished marble, slate);
- is ideal for carrying out a strong degreasing cleaning, also eliminating consistent accumulations of greasy dirt and biological encrustations (blackening on the outside); can facilitate the removal of "dark spots" from sulphation on cotto;
- leaves no harmful residues in the absorbent material;
- does not leave unpleasant odors during use and in the rooms.

INSTRUCTIONS FOR USE:

It can be used pure or diluted in water.

- Pure: to remove wax and consistent residues of oils, waxes, large accumulations of greasy dirt, organic residues and as a descaler for "dark stains" on cotto.
- SGRISER diluted in an equal part of water: for washings where a strong degreasing action is required.

How to use the product:

- In conditions of normal dewaxing, spread the product on the surface and leave it to act for at least 10-20 minutes;
- Rub the surface with buffers or discs in plastic fibers or with nylon brushes;
- Under difficult-to-remove treatment conditions, the (pure) product can be processed and left to dry on the surface for up to 12 hours to increase the strength;
- Repeat the wash if necessary;
- On acid-resistant surfaces neutralize with aqueous acid solution with VIACEM or DELICACID;
- For other more delicate materials (eg polished marble and grits, slates) rinse only with plenty of water.

PRECAUTIONS:

- do not use on wood, linoleum, rubber and PVC;
- protect painted and anodized aluminum surfaces from contact with SGRISER.

NOTES:

Our recommendations are based on current research knowledge and are intended to give the best information to the buyer-user. However, these indications require preliminary examinations and tests to the fields of use, to the types of materials present and to the various conditions of application. The user decides independently on suitability and on the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

WARNINGS: DANGER

Hazard statements: Causes severe skin burns and eye damage.

Precautionary statements: Do not breathe dust / fume / gas / mist / vapors / spray. – Wear protective gloves/clothing and protect eyes/face. – IF SWALLOWED: rinse mouth. DO NOT induce vomiting. – IF IN CONTACT WITH SKIN (or hair): immediately take off all contaminated clothing. Rinse the skin [or take a shower]. – IF IN CONTACT WITH THE EYES: rinse thoroughly for several minutes. Remove any contact lenses if easy to do. Continue rinsing. – Immediately call a POISON CENTER/doctor.

Contains: Sodium hydroxide; Ethanolamine

UFI:8800-F0K9-0002-N5JV

Ingredients in accordance with Regulation (EC) No 648/2004:

Non-ionic surfactants below 5%.

Rev8-Ver28112023

PACKAGING:

- 1 lt Plastic bottle box 6 pieces;
- 5 lt Plastic tank box 4 pieces;
- 20 lt Plastic tank;
- 200 lt Drum in recycled plastic.

YIELD:

Depending on the dirt to be removed and the absorption of the material:

- for energetic washing 1 lt / 4-8 m²;
- for normal washing 1 lt / 10-15 m².

TECHNICAL DATA:

- Physical state: clear yellow liquid
- Odor: characteristic
- Specific weight (g / cm³): 1.01
- pH (20 ° C) of the pure product: 14
- Flash point (ASTM): not flammable
- Solubility in water: soluble in water

STORAGE:

Keep the product tightly closed at temperatures between 0°C and + 30°C and not exposed to sunlight for a long time. The stored product has a useful life of 2 years.
